

B

- 题意：给你一串数 $s_1, s_2, s_3, \dots, s_n$ 。如果满足下标 i_{j_1}, i_{j_2} 满足 $i_{j_1} < i_{j_2}$ 并且有 $s_{i_{j_1}} < s_{i_{j_2}}$ 。则称这样的安排是美的，题目要你找出一串序列中最长的，具有美感的数列长度。

- 代码：

```
# include <bits/stdc++.h>

using namespace std;

void solve() {
    int n;
    cin >> n;
    vector <int> a(n + 1), dp(n + 1);
    for (int i = 1; i <= n; i++) {
        cin >> a[i];
    }
    int answer = 0;
    for (int i = 1; i <= n; i++) {
        int mx = 0;
        for (int j = 1; j * j <= i; j++) {
            if (i % j == 0) {
                if (a[j] < a[i]) mx = max(mx, dp[j]);
                if (a[i / j] < a[i]) mx = max(mx, dp[i / j]);
            }
        }
        dp[i] = mx + 1;
        answer = max(answer, dp[i]);
    }
    cout << answer << endl;
}

int main() {
    int tt = 1;
    cin >> tt;
    while (tt--)
        solve();
}
}
```
